Michael Wall

Dear Consultee/Community Member

### CARRON VALLEY FOREST DESIGN PLAN DROP IN MEETING

Weekend 17-18 July 10am – 4pm at Forest Office, Main Carpark

We want your views on how the forest at Carron Valley should be planned for the future.

Our Forest Design Plans define

- when patches of forest will be felled over the coming decades
- the shape of each patch of felling
- what trees will be replanted afterwards
- where broadleaves and open space are going to be

and just as important, what recreation, conservation, and archaeology we know about, and how they are incorporated into the Plan and improved for the future. But perhaps we've missed something!

We want you to tell us

- how you use the forest
- what it should look like in the future
- what you know of conservation interest
- local landmarks and archaeology

and anything you want looked after or kept. All your comments will be incorporated into the Plan so we can deliver an even better forest for you and for the future.

Just drop in for tea/coffee to the Forest Office beside the main carpark, see the plans and chat to Andy Gallacher, Ranger, and me. Can't make it? Phone me at this office or email [malcolm.crosby@forestry.gsi.gov.uk](mailto:malcolm.crosby@forestry.gsi.gov.uk) with your comments and suggestions.

Malcolm Crosby  
Planning Forester

**PS Agencies will be sent maps and documents for comment as usual, but all are welcome to attend the Drop In Meeting too.**
