Subject: RE: draft TRC report

Niall

What I mean is Alan Stevenson has not said 'yes we agree with everything in here & will follow the advice given' The report is being included with all the other areas of Scotland to produce the nat Strat, a draft is with Alan S now.

Any development at CVN is dependent on status given to it in the strat, and whether FCS has any money to put to it. If no FCS ££ forthcoming, then dependent on getting external ££. Sound familiar...?

Read it last night over a bottle of wine - an interesting take on matters.

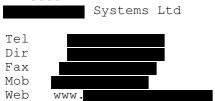

What does the process of ratification actually involve and will CVDG be afforded the opportunity to contribute in any shape or form?

I also noticed that Craigvinean is mentioned - specifically in terms of penetration / displacement at the other 'Central Belt' venues. The inference is that development at this location is a given - can you confirm?

It's a huge doc - good luck. Don't print whole thing. Sections 1-8 apply to all sites, then just look for the CV pages after that.

Remember this has not been ratified by FCS, and will be used to inform FCS National Cycling Strat.

Thanks

Rena

Meant to add

Could I have a copy of the draft TRC report and EI assessment?

Thanks Rena

We'll discuss this and revert back.

Trail feedback is very good.

Jamie and Dave are meeting WBG on site next Monday to resolve the rework methodology for the 'as dug' on the last few hundred metres of the lower trail. It did appear to be as hard as nails but with the severe wet weather and with people now riding it, it probably has too much soil content to give us the durability we need.

The formation itself is sound but I think WBG will end up resurfacing the top with quarried material and we'll be good to go.

Signposts are all in and looking good (and plumb!) & $\mbox{\rm JW}$ is on the case with the plates.

We'll get back to you with the names by the end of the week - needless to say its been harder settling that one than just about anything else

Regards

Subject: CVDG/FCS agreement

Dave

This interim agreement addresses H&S, which is the most important issue to clarify for now. If you see anything else to include, let me know.

Once CVDG have had a chance to read & discuss, we can exchange signed copies.

For info, there is a push within FCS to have more formal agreements where FCS accept maint commitment. Depending on outcome, the FCS/CVDG relationship may become more formalised.

What's the feedback from the trails?
